

# About Us

The founder, having been deeply involved in reduction of NO<sub>x</sub> emissions from boilers and heaters since 1988 when SCAQMD promulgated the Rule 1143, has a conviction to help boiler owners with most affordable state-of-the-art De-NO<sub>x</sub> SCR Systems. With greater emphasis in cleaner air as time goes by, De-NO<sub>x</sub> SCR systems, the best available control technology, ought to be the first choice for owners of all boilers, oilfield steam generators and refinery heaters. We at C&C Panasia Incorporated, in close alliance with other reputable companies are determined to offer the most advanced SCR Systems at most competitive and affordable price and ensure that each system is installed properly, started up smoothly and operating stably and efficiently in addition to complying with all the applicable Rules and Regulations. PaNO<sub>x</sub><sup>™</sup> De-NO<sub>x</sub> SCR Systems incorporate an advanced design which has been tested and proven for over a decade. The systems also incorporate the most advanced and efficient corrugated pattern catalysts. With our experience and expertise in low NO<sub>x</sub> burners in addition to De-NO<sub>x</sub> SCR systems, we can provide you with a complete, one-stop solution to any of your emission or combustion related problems.

Preferred Utilities Manufacturing Corporation is an engineering-based manufacturer of products for commercial, institutional, industrial and nuclear power facilities. Our products include fuel oil handling systems and components, boiler instrumentation and controllers, high quality burners and nuclear power plant outage reduction tools and component parts. Continuous research and development is applied to our existing products and is helping us to lead the industry with new and innovative power plant solutions. Preferred's manufacturing, engineering and administrative headquarters is located in Danbury, Connecticut with regional sales offices located in Massachusetts, Oklahoma, Texas, and Oregon. Preferred's regional sales offices serve to continuously strengthen independent sales representative organization's sales and service activities throughout North America. W.N. Best Combustion Equipment, a Division of Preferred Utilities Manufacturing Corporation, offers both combustion solutions and emission compliance products in one packaged system. With our controls background, your existing boiler, burner, and controls can be evaluated for improved efficiency and operational safety. Energy savings can be customized with emissions compliance from small firetube boilers to large industrial boilers.
